

Pitchbook

Office

PROJECT DESCRIPTION:

Client:
Pitchbook

Architect:
JPC

Size:
16,000 SF

Location:
901 5th Avenue,
Seattle, WA 98164

Year:
2018

To deliver Pitchbook's third floor (Floor 24) at 901 Fifth Avenue, Gateway provided full demolition of multiple existing tenant spaces to create a large open structure, completely new MEP installation, and build-out of the new Class-A space. The project features custom reclaimed-wood installations, ceiling clouds, industrial-style lighting, a bar with high-end tile work, and large flexible lounge area with surrounding booth seating. This project was a successful collaboration between Gateway, Pitchbook user representatives, and JPC and effective pre-construction planning.
